

Adaptus Statistica - Annual Inter-Collegiate Fest

The Department of Statistics and Frequentia, the Statistics Association, organized a remarkable intercollegiate fest called Adaptus Statistica to promote and celebrate the study of statistics.

The event aimed to bring students together from different colleges and engage them in a series of eight exciting and challenging events. The event started on the morning of April 10, 2023, with a grand inauguration ceremony that set the tone for the fest. The chief guest for the event was Dr Rabbai Akkiba Angiras, Dean of the School of Physical Sciences at St. Joseph's University. His inspiring speech motivated the participants and emphasized the significance of statistics in decision-making and problem-solving.

Adaptus Statistica comprised a variety of events that tested the participant's statistical skills, creativity, and problem-solving abilities. The fest included quizzes, case studies, paper presentations, coding challenges, data visualization, and data analysis. The participants were divided into teams, and each team was assigned a mentor from the organizing committee who provided guidance and support throughout the event.

The festival concluded on April 11, 2023, with a grand valedictory ceremony, where the winners were felicitated and awarded prizes. The fest was a resounding success, with participants having a great time. Adaptus Statistica provided a platform for students to showcase their skills, learn from experts, and network with like-minded individuals.
