

Anagrams

The Biochemistry Anagrams event, hosted by Deboshree and Lisa, both from the 1st year Biochemistry-Zoology, took place in room S301 at 1:00 PM. The hosts efficiently provided clear instructions and allocated 7 minutes for participants to create as many English and scientific words as possible from the given anagram, "carbonic anhydrase."

Participants were equipped with paper for their word-building endeavor, and any queries were addressed by the hosts before the timer commenced. Once the time elapsed, the collected papers were reviewed, and winners were announced based on the number of words framed by each participant.

Approximately 30 individuals actively participated in the event, showcasing their linguistic and scientific acumen. The prize winners were as follows:

- Alvita - 57 points
- Yashika - 49 points
- KC Kaverappa - 41 points

The Biochemistry Anagrams event not only provided an entertaining platform for participants but also served as an engaging way to reinforce their knowledge of English and scientific terminology
