

## **REPORT ON INDUSTRIAL VISIT TO AVONPLAST INDUSTRIES PVT. LTD.**

St. Joseph's University, Bengaluru, conducted a highly enriching Industrial Visit to Avonplast Industries Pvt. Ltd. in Bommasandra on August 26, 2023. Totally 60 first-year BCOM IFA students, led by Mrs. Reshma Vijayan, embarked on a journey to understand the intricate processes and systems employed in the industry.

The visit commenced with an insightful briefing by an industry expert, shedding light on the unique process patterns adopted by Avonplast Industries Pvt. Ltd. Students gained valuable knowledge about the manufacturing, production, and processing of various products. Witnessing the processing of premium products offered a firsthand experience of the company's commitment to quality.

Throughout the visit, students were mentored on the timing processes for substance assembly and parts production procedures. A comprehensive understanding of the demand and supply patterns essential for mass production was emphasized.

The primary objective of the visit was to provide practical insights into Assembly Line Management, a subject taught in class. Students delved into various aspects of the Assembly Line process, production management, multiple processes management, and the critical aspect of demand-supply maintenance. Exposure to the operational intricacies of the manufacturing unit and functional plants deepened their understanding.

The visit aimed to instill real-time experience in managerial aspects, company operations, and the assembly line processes of various substances by Avonplast Industries Pvt. Ltd. The scheduled visit turned out to be a delightful and excellent learning experience for the students, offering them valuable insights into the unique processes and systems adopted by the company.
